

# VOICE • DATA

PEACE *of* MIND

## The Total Communications Package

*Genesis, a full service telecom provider since 2005, is your OneSource for end-to-end communications solutions.*

Genesis provides best-of-breed voice and data services to the commercial and residential marketplaces. By combining services from multiple carriers we can provide the best solution set for each individual application, regardless of the required complexity. At the same time, we keep it simple for the customer by presenting single-invoice solutions serviced through a single customer care center.

The Genesis OneSource® Solution delivers a wide range of products and services, giving you all the tools needed to be successful in today's highly competitive marketplace. From voice and data offerings, to equipment and phone systems and back office support services, our diverse capabilities define NBS as your one source for telecom solutions.

### **EXPERIENCE**

The Genesis staff includes industry leaders at all corporate levels, whose collective expertise ensures customized products and services of unsurpassed quality and reliability. Our networking and service organizations are committed to providing timely implementation, unparalleled support and the very best in customer service.

## Products and Services

### *VoIP Services*

Genesis V.o.I.C.E. (Voice over Internet Communications Exchange) is a revolutionary VOIP platform for small to medium-sized businesses and residential accounts.

Why pay high upfront costs for telephone equipment that begins obsolescing before it's out of the box? With Genesis V.o.I.C.E. you can get a full-featured, advanced communications solution for your business without a large cash layout. New upgrades are built into our centralized platform so you know you always have the latest features - and in most cases, at no extra cost to you.

For companies with multiple offices or remote workers, the benefits are even greater. All on-net calls are free, and users get all the same capabilities as if they were sitting at a desk in the main office.

### *Managed Network Services*

Genesis management services range from network design and implementation to proactive monitoring and fault management practices. We remotely manage customer premise equipment on a 24/7/365 basis, opening trouble tickets on any performance impacting event. The client is updated continuously until the problem is resolved.

We use our extensive network capabilities and technical expertise to offer these managed solutions, allowing customers to focus their resources on their core business needs.

### *Local and Long Distance Voice*

Genesis offers competitive local and long distance rates over switched or dedicated circuits - PRI and BRI. Combining voice and Internet is easy and economical when using one of our Integrated Voice and Data Services (IVAD).

Other voice services include:

- Calling Cards
- International Toll Free Services (ITFS)
- Teleconferencing

### *Internet*

Our strategic partnerships allow us to offer varied solutions for dedicated Internet access. Redundant multiple-carrier solutions can be offered on a single invoice - thanks to the Genesis proprietary billing package - and managed by MIS professionals.

From T-1s to Gigabit Ethernet, NBS is the answer to your Internet needs.
